Subject: FW: Spot Forecast for LINDSEY LAKE TANKER SPILL - I-84 AT MP 54

---

Hi all:

Made a request to the National Weather Service for an incident spot forecast. Details below. Appreciate the quick turnaround by the team at NWS Portland. This will help us plan our operations in the coming days.

Very respectfully,  
Jamie

Spot Forecast for LINDSEY LAKE TANKER SPILL - I-84 AT MP 54...OREGON DEQ/USEPA  
National Weather Service Portland OR  
352 PM PST Sat Feb 16 2019

Forecast is based on forecast start time of 1600 PST on February 16.  
If conditions become unrepresentative...contact the National Weather  
Service Portland, Oregon office.

.DISCUSSION...

A rather cool air mass will remain over the region for next  
several days. Will see showers into tonight, but will gradually be  
decreasing after midnight. Generally dry weather for Sunday and  
Monday, though will have patchy fog or freezing fog at night into  
the morning hours. Next chance of rain arrives later Monday  
night. Most of next week will be cool and unsettled, with snow  
levels generally 500 to 1000 feet.

Pressure gradients remain light, so no strong east or west winds  
expected through Monday.

.REST OF TODAY...

Sky/weather.....Cloudy. Showers, possibly mixed with snow at  
times down to Columbia River level.  
Snow level 800 to 1000 feet.  
Little if any accumulation below 800 feet, but  
up to 2 inches likely above 800 feet.

Chance of pcpn.....100 percent.  
Max temperature.....38 to 41.  
Min humidity.....above 85 percent.  
Dewpoint.....30 to 35.  
Surface winds.....West winds 3 to 7 mph.  
Visibility.....3 to 5 miles.

.TONIGHT...

Sky/weather.....Cloudy. Showers, mixed with wet snow at times down  
to Columbia River level.  
Snow level 500 to 800 feet.  
Little if any accumulation below 500 feet, but  
up to 2 inches likely above 500 feet.  
Patchy fog and freezing fog later tonight.

Chance of pcpn.....90 percent.  
Min temperature.....22-27.  
Max humidity.....88-93 percent.  
Dewpoint.....27 decreasing to 22 early morning.  
Surface winds.....West winds 6 to 11 mph decreasing to up to 6  
mph late in the evening, then becoming drainage  
less than 5 mph after midnight becoming west up  
to 6 mph early morning.  
Visibility.....MISSING.

Weather Details for Tonight....
